SUMMARY

Software Developer with internship experience building web applications using Angular, React.js, Node.js, Express.js, MongoDB, and REST APIs. Experienced in modular architecture, reusable components, API integration, authentication, debugging, and collaborative development.

EDUCATION

Ajay Kumar Garg Engineering College (AKGEC), Ghaziabad **2023 – 2026**
B.Tech in Computer Science and Engineering CGPA: 8.21/10

EXPERIENCE

CodeStore Technologies Pvt. Ltd. **25 May 2026 – Present**
Software Engineer Intern

- Developing an e-commerce application using Angular 19, TypeScript, Angular Material, Bootstrap, RxJS, and NgRx, following modular architecture and reusable component practices.
- Implementing customer, guest, and admin workflows, including authentication, role-based access, routing, cart, wishlist, pagination, filtering, infinite scrolling, and admin features; integrating .NET-backed REST APIs using services, dependency injection, route guards, and RxJS.
- Handling guest-cart persistence and post-login cart merging, including product availability and quantity updates; improving efficiency through lazy loading, validation, reduced redundant API calls, and efficient data handling.
- Debugging UI and API integration issues using Postman, Chrome DevTools, and breakpoints; participating in code reviews and collaborating through Azure DevOps work items, Git branches, pull requests, merge-conflict resolution, and daily Scrum updates.

Softpro India Pvt. Ltd. **1 July 2025 – 31 Aug 2025**
Full Stack Developer Intern (MERN)

- Developed a healthcare management application using React.js, Node.js, Express.js, and MongoDB for appointment and user workflows.
- Built and integrated REST APIs; implemented JWT authentication, role-based authorization, input validation, and error handling.
- Worked with MongoDB schemas and indexing, and tested and debugged API integrations using Postman and browser developer tools.

PROJECTS

WhizChat – AI-Powered Chatbot [Live Demo](#) | [GitHub](#)
React.js, Node.js, Appwrite, Tailwind CSS, Gemini API

- Built an AI-powered chatbot integrating Gemini API for conversational responses with persistent chat storage and a responsive React interface.
- Implemented authentication, session management, and reusable components to organize chat interactions and application state. Integrated frontend components with Appwrite backend services and handled chat data flow to provide a consistent user experience.

HealthNexus – Healthcare Management System [Live Demo](#) | [GitHub](#)
React.js, Node.js, Express.js, MongoDB

- Developed separate Admin, Doctor, and Patient workflows for appointment scheduling, patient records, doctor management, and medical reports.
- Implemented JWT authentication, protected routes, role-based authorization, and secure password handling to control access to application features.
- Designed and integrated REST APIs with MongoDB using Express.js and Mongoose for healthcare data operations.
- Debugged frontend and API integration issues, validated endpoints using Postman, and deployed the application using MongoDB Atlas and Render.

GlobalLodge – Property Rental Platform [Live Demo](#) | [GitHub](#)
Node.js, Express.js, MongoDB, EJS, Tailwind CSS, Passport.js, Cloudinary

- Built a property rental platform supporting listing creation, updates, deletion, search, filtering, reviews, and user authentication. Implemented Passport.js authentication, session-based access, Cloudinary image uploads, and input validation for listing workflows.
- Structured Express.js routes and server-rendered EJS pages, integrating MongoDB through Mongoose for listing and review operations. Added centralized error handling and asynchronous error management to handle invalid requests and application failures.
- Debugged route, validation, and database issues while refining listing workflows and improving the reliability of CRUD operations.

TECHNICAL SKILLS

Languages	JavaScript (ES6+), TypeScript, C++, C, SQL
Frontend	Angular Js, React.js, HTML5, CSS3, Angular Material, Tailwind CSS, Bootstrap
Backend	Node.js, Express.js, REST APIs, JWT Authentication
Databases	MongoDB, Mongoose, SQL, PostgreSQL
Tools	Git, GitHub, Azure DevOps, Postman, VS Code, Chrome DevTools
Core Concepts	OOP, Data Structures and Algorithms, Debugging

ACHIEVEMENTS

- Solved **300+** **coding problems** on LeetCode and CodeChef.
- Secured **27th rank** in the Let's Code – Battle of Logic Final DSA Round and **712th rank** in the Aptitude Qualifier Round. [Certificate](#)
- Completed a **4-week Project-Based Frontend Development Training** through IBM SkillBuild (CSRBOX). [Certificate](#)
- Completed the **30 Days DSA Bootcamp in C++** on Unstop. [Certificate](#)
